

PRODUCT

CEDELEX.

Easily conduct trademark and design searches
User-friendly • Smart and reliable

Discover a state-of-the-art search platform that brings you the best in trademark and design search. Experience unparalleled user comfort and create truly professional reports with ease.

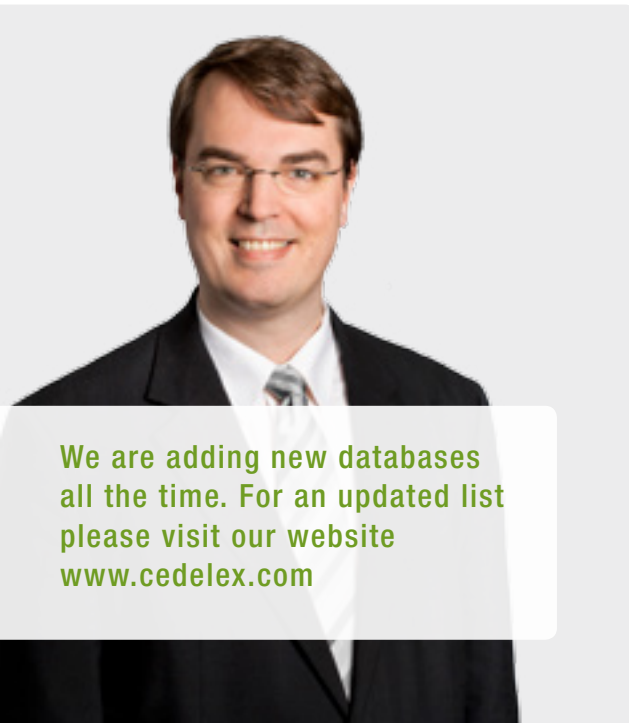

Proven quality

Through years of upgrading and fine-tuning, Cedelex has become an integral part of the team for trademark law firms, in-house counsel and trademark owners all over the world.

Special bonus for new users

All newcomers get 24 hours of FREE trademark searching in any one of our databases!

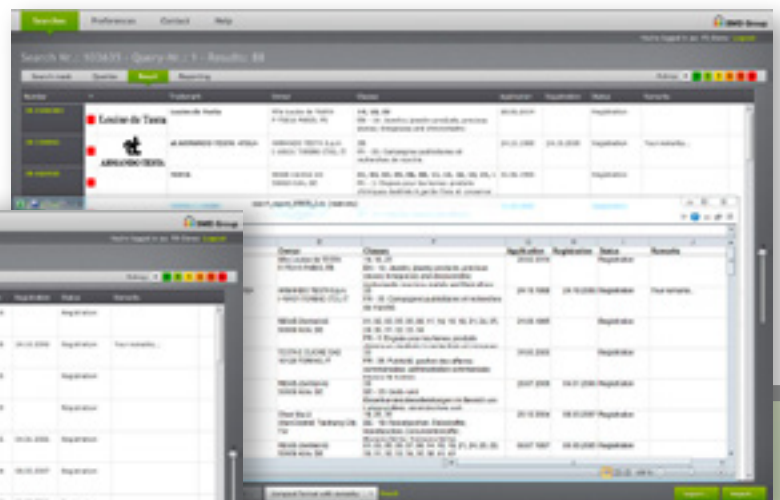

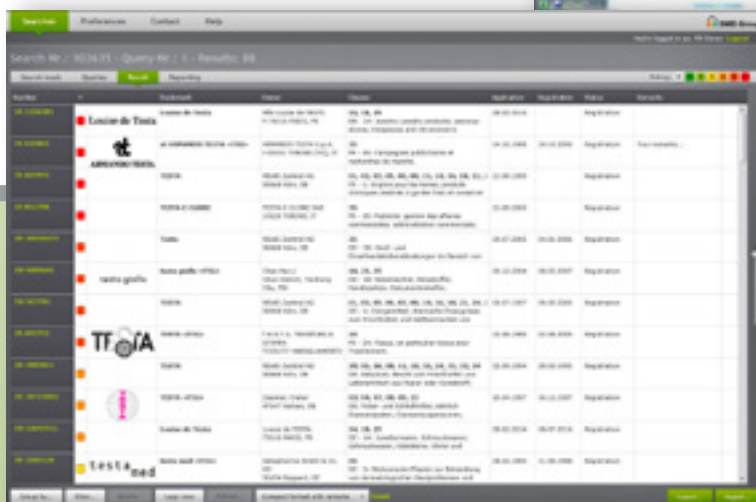

Learn more and become a Cedelex user today!

We are adding new databases all the time. For an updated list please visit our website www.cedelex.com

Cedelex in a nutshell

- Trademark searches in the most important global jurisdictions across all continents
- Industrial design searches in nearly 40 national registers
- In-use searches on pharma names in the IMS database
- Create tailor-made reports
- Administer your searches
- Work more efficiently with your team

COOL, SMART AND EASY.

Here are the Cedelex highlights

Always accessible

The program is browser based; no need to bother with downloads or updates. It provides access to the best available data online. Cedelex is supported by Microsoft Silverlight and is available for Internet Explorer and Safari, compatible with Microsoft Windows & Mac OS X. The search algorithms are constantly improved.

Unlimited search options

You can carry out identical or complex similar searches. The entry mask, or dashboard, contains 20 different search criteria. The number of hits can be adapted by choosing a minimum similarity degree for the trademarks found. For each hit you can perform an additional internet search.

Fully customisable search view

To make each project easier, you can choose your individual search and display settings and create your own favourites (such as information given on the trademarks found, arrangement of table columns, logos etc.).

Modular layout of reports

To best meet your needs, the report layout is entirely flexible: All elements of your search reports may be freely determined. Personal report standards may be saved for future projects.

Pre-selection service for searches with many hits

If your project is very important or if you are short on time, our in-house experts offer a pre-selection service: With Cedelex, you are able to send the list of results with a single click. Our specialists will identify the most important hits based on similarity to the search term. The reduced hit list will be sent to you by the following business day. You can directly get to work on the updated list with Cedelex – no time wasted importing data.

Collaborative working

Assign access permissions to colleagues and share searches, preferred settings or report layouts to better collaborate as a team. Multiple users can work on the same project successively or even simultaneously to increase work efficiency.

Easy data export

You can easily create Excel, Word or PDF files from your search results. The layout is directly tied to the screen view: What you see is what you get. Logos can be exported just as quickly and easily. XML format is even available as well.

Custom rates

Choose your own subscription package or pricing option based on use. Various price models are available to best match your individual needs.

Flexible usage model

Subscriptions are not connected to workplaces, but to individual users: If you buy two licences, two users may use the software at the same time, no matter where they work.

Unique support and individual training is a matter of course for us.

This is what our loyal clients say:

We appreciate the user-friendliness of Cedelex. The automatic storage of previous searches is highly beneficial, because we can access former searches at any time from anywhere.

Yvonne Nemitz, Patent Attorneys Einsel & Kollegen

The ranking of search results according to similarity is very helpful. By this means, we can conduct searches for our clients within less time. The multitude of search criteria helps us to perform intelligent queries and search strategies.

Georg Puchberger, Patent Attorneys Puchberger, Berger & Partner

The browser-based Cedelex is excellent. The overview of results including list view as well as detailed views saves us a lot of time. Furthermore, the export features are extremely comfortable.

Hans-Peter Lieck, Boeters & Lieck Patent Attorneys
